Experience

TransferX *Remote*
Full Stack Developer *Jul 2026 – Present*

- Built the backend for an ed-tech transfer platform on Supabase and Postgres: 87 tables, 42 migrations, 71 functions, with row-level security across all data tables.
- Designed a course planning engine that maps university transfer requirements to a student's own college catalogue, resolving prerequisite chains into a semester-by-semester plan.
- Built a deadline engine over verified application dates from 19 universities, generating each student's task schedule and recalculating it automatically as their profile changes.

Community Dreams Foundation *Remote*
Product Manager *Jul 2025 – Jun 2026*

- Reduced requirements churn by 40% by introducing structured discovery sessions with community stakeholders, turning their feedback into clear, sprint-ready specs so the team stopped reworking scope mid-sprint.
- Cut backlog grooming time by 30% by establishing the team's first product health dashboard, giving cross-functional teams one shared view of KPIs, sprint velocity, and delivery risk for faster prioritization decisions.
- Owned the roadmap, scope, and release decisions for CDF's in-store energy solutions product, balancing stakeholder needs against team capacity to take it from concept to pilot.

Sarjen Systems Pvt. Ltd. *Ahmedabad, Gujarat*
Machine Learning Intern *Jan 2023 – Apr 2023*

- Designed and deployed an NLP chatbot using Python and spaCy, automating query responses and improving response efficiency by 30%, reducing manual support time.
- Built a Medical Entity Recognition (MER) model with TensorFlow and spaCy, achieving 70% higher accuracy in extracting patient and ailment entities from research papers.
- Engineered scalable data pipelines using Pandas and NumPy for text preprocessing and model training, cutting processing time by 20% and accelerating iteration cycles across the ML team.

Grownited Pvt. Ltd. *Ahmedabad, Gujarat*
Software Developer *Jul 2021 – Dec 2021*

- Engineered backend workflows in Python and SQL, eliminating manual processes and cutting data retrieval time by 35%, directly enabling the analytics layer used for PM-level release decisions.
- Built and optimized cross-platform UI components in React, TypeScript, and Flutter, reducing average page load time by 30% and improving user retention by 20% across web and mobile.
- Partnered with product and design teams to align technical implementation with user requirements, cutting revision cycles by 40% and accelerating feature sign-off from 2 weeks to 3 days.

Product Manager *Dec 2021 – Dec 2022*

- Owned the roadmap for a 0→1 web and mobile platform, defining scope, writing user stories, and shipping a full product cycle on time and within budget across 3 engineering squads.
- Drove a 30% rise in client satisfaction and 25% reduction in post-release defects by embedding structured feedback loops, acceptance criteria, and QA checkpoints into every sprint.
- Built a live KPI and velocity dashboard in Confluence, surfacing bottlenecks that improved sprint throughput by 20% within two quarters.

Huddle and Score *Ahmedabad, Gujarat*
Web Developer *Jul 2022 – Dec 2022*

- Rebuilt the company website in React.js, reducing page load time by 40% and driving a 25% lift in user engagement within the first month post-launch.
- Designed and integrated an MSSQL database to manage user registrations, queries, and bookings, cutting manual data handling by 40% and reducing query resolution time by 35%.
- Overhauled UI/UX workflows and front-end validation, reducing form submission errors by 30% and lifting user satisfaction scores by 20% within two quarters.

Technical Skills

AI/ML: Prompt Engineering, NLP Pipeline Design, ML Feature Scoping, LLM Evaluation
Languages: Python, C/C++, HTML, CSS, JavaScript, Dart, TypeScript, SQL
Libraries/Frameworks: Pandas, NumPy, spaCy, TensorFlow, Flutter, Angular, React.js
Databases: MySQL, MongoDB, MSSQL, SQLite
Developer Tools: Git, GitHub Actions, VS Code, Power BI, Tableau, Docker
Methodologies: Agile, Scrum, Kanban, Waterfall, Six Sigma, Lean
Tools: Asana, ClickUp, Jira, Trello, Notion, Confluence,Slack, MS Teams, Google Workspace, Sharepoint, MS Visio, MS Project, Microsoft Office Suite

Education

Stevens Institute of Technology *GPA: 3.90/4.0*
M.S. in Software Engineering

- **Relevant Coursework:** Cost Estimation and Metrics, Decision and Risk Analysis, Agile Methodologies

Indus University *GPA: 3.71/4.0*
B.Tech in Computer Engineering
